WELCOME TO OUR PLACE

Let us take you on a culinary adventure throughout the United States. Food is how we remember where we've been and who we were when we were there.

It's the sandwich wrapped in wax paper on a long drive, the pie that only shows up at holidays, the recipe that tastes different depending on whose kitchen you're standing in. Long before we remember street names or mile markers, we remember meals. And in America, those meals change every time you cross a state line.

Made in the USA: A Plate for Every State is a celebration of that idea — that every place has a flavor, and every flavor has a story. From coast to coast, this book travels through all 50 states, sharing the dishes that locals grow up with, argue about, and proudly claim as their own.

Some of these recipes are famous. Others are quiet classics. Some were born out of necessity, others out of celebration. All of them belong to the places they come from. Paired with each recipe is a story rooted in geography, history, memory, or tradition, because food doesn't exist in a vacuum. It exists at tables, in families, and in moments worth remembering.

This isn't a rule-heavy cookbook or a quest for perfection. It's meant to be cooked from, laughed over, and occasionally splattered with sauce. Measurements are familiar, instructions are approachable, and the focus is always on flavor and feeling, not fuss.

Whether you're recreating something that feels like home, discovering a new regional favorite, or simply curious about how the country eats, this book invites you to slow down and take a seat.

After all, the best way to understand a place has always been the same.

Pull up a chair.

Pass the plate.

Stay awhile.

NOTES FROM THE KITCHEN

TEMPERATURES & DONENESS

Every oven, grill, and pot of oil in this book carries both Fahrenheit and Celsius — so the recipes travel as easily as the dishes themselves.

When a cut of meat needs a particular internal temperature, an instant-read thermometer is the surest path; color and time will only take you so far. The marks these recipes lean on most are gathered here.

What you're cooking	Aim for
Deep- or shallow-frying	350–375°F (175–190°C)
Beef, medium-rare	130°F (54°C)
Beef, medium	140–145°F (60–63°C)
Ground meats & burgers	160°F (71°C)
Poultry, cooked through	165°F (74°C)
Fish, flaky and just done	145°F (63°C)
A low, slow roast (prime rib)	200°F (93°C) oven, then seared hot
Most baking in this book	350–400°F (175–204°C)

Doneness is a matter of taste as much as safety — pull meat a few degrees early and let it rest, and it will climb to just where you want it.

Now — To the hearth. Let's begin.
